

It's a bird! It's a plane! No, it's the Nakamichi 600 II.

The new 600 II Cassette Console does not leap over tall buildings in a single bound. It has no flashing lights. It doesn't have a built-in computer, and it won't make coffee for you in the morning.

But the 600 II does one thing better than any other cassette deck in its class: make recordings that are indistinguishable from the original.

Beneath its functionally elegant, sloped panel lies some of the most sophisticated engineering in the world. Thanks to Nakamichi's latest achievement in magnetic technology, the incredible SuperHead, the 600 II sets new standards for two-head cassette deck performance, with a guaranteed minimum frequency response of 35-20,000 Hz  $\pm$  3dB.

These days, you can buy a three-head cassette deck for about half the price of the 600 II. But anything less than Nakamichi, regardless of the number of heads, motors, etc., would mean a compromise in sound quality.
